

Column: What is UNICEF?

The United Nations Children's Fund (UNICEF) is an international organization established in 1946 to provide emergency assistance to children suffering in the aftermath of World War II. UNICEF's missions are to save children's lives, to defend their rights, and to help them fulfil their potential, from early childhood through adolescence. UNICEF staff work in over 190 countries and territories.

Exercises for further thought and research

- [16-1] Think about what disability and the conditions of being disabled mean to you.
- [16-2] Consider why special education programs need to teach children with disabilities, reflecting on your own experiences.
- [16-3] Examine how Cambodian society views disabilities.
